Outlook. Note: PhoneMiner cannot extract data from Outlook.com. Use PhoneMiner to: • Search through any file that PhoneMiner supports for data • Print or export data to CSV, HTML, PDF, XLS or XLSX formats • Share data to any Windows or Mac computer • Read Kindle books Requirements: • PhoneMiner can read any backup file in iTunes, Gmail or Outlook.com format. If you want to read your contacts from a Sony or Blackberry, you will need a

Windows/Mac computer with iTunes installed on it SAS program to calculate annual pension entitlement for the EU Employees, should one fulfill the five years of continuous pensionable service. Installation :1. Download the files below to the directory where you have the SAS program installed (normally in "C:\Programs\DATA" or "C:\Programs\PROGRAMS" folder)2. Make a copy of this folder to keep it safe and secure for the future use. SAS program

to calculate annual pension entitlement for the EU Employees, should one fulfill the five years of continuous pensionable service. This program allows for calculation of pension entitlement. The calculations are based on five years of continuous service during the five years of the pensionable service period. The five years of continuous service are counted from the date of appointment as employer (which is at least the year in which the employee started his/her service

in that employer), regardless of age. The first condition for a pension entitlement is that the pensionable service is more than 5 years, or if it is less than 5 years, the qualification period. The pensionable service is counted back from the qualifying year, and a person is entitled to a pension only if he/she has reached retirement age and the last 5 years of pensionable service have been completed. 1. Source code for one program to calculate EU employees pension entitlement

should they fulfill the five years of continuous service. It can be used for database.
