I also have the good fortune of being surrounded by my creative peer group, so we regularly talk through the creative, technical, and business pros and cons of the digital realm. I also love when folks share their work on social media like Instagram, which is where I first came across Emily's work. It's really inspiring because I can see how the digital tools she uses allow her to tell her story in her own unique way. Alpha layer is mainly used in image editing to show unprinting of the items. When we make a photo, the object is visible on the background layer and it is also printed on the paper as there is a transparent green and blue layer on the object. Alpha is used to avoid the part of a design from being printed on the paper or to make a small color in a design part.
