In this article, we will show you how to download and install Dota v6 77 ai 1.1.7, a modified version of the official Dota 6.77 AI map that was created by a fan named JoJoJo. We will also give you some tips and tricks on how to play this map and have a great time.

## **What is Dota v6 77 ai 1.1.7?**

### **A modified version of the official Dota 6.77 AI map**

Dota v6 77 ai 1.1.7 is a custom map for Warcraft III that is based on the official Dota 6.77 AI map, which was released by IceFrog in December 2012. The official map features an improved artificial intelligence (AI) system that allows you to play against computer-controlled opponents (bots) in a 5v5 match.

Dota v6 77 ai 1.1.7 is a fun version of the official map that was created by JoJoJo, a fan who wanted to add more variety and excitement to the game. He used an unofficial AI version of Ciel as a base and modified it with his own ideas and additions.

### **Features of Dota v6 77 ai 1.1.7**

#### **Fixed bugs, added new heroes and items, and more**

Dota v6 77 ai 1.1.7 has many features that make it different from the official map, such as:

- Fixed 99% of bugs that were present in the original AI version.
- Added Orcish Engineer, a new hero that can build towers, traps, and bombs.
- Added two new fun items: Santa Hat, which gives you a random buff when you kill an enemy, and Persuasive, which allows you to control an enemy hero for a short time.
- Added ND mode, which makes you respawn instantly after you die.
- Added snow terrain and Christmas models when playing in fun mode.
- And more!

## **How to download and install Dota v6 77 ai 1.1.7?**

### **Download the map file from a reliable source**

The first step to play Dota v6 77 ai 1.1.7 is to download the map file from a reliable source, such as [HIVE](#), where you can find the latest version of the map uploaded by JoJoJo himself.

The map file is named DotA v6.77 AI 1.1.7 Fun 2.7c.w3x and it has a size of about 8 MB. You can download it by clicking on the download button on the website.

### **Copy the map file to your Warcraft III maps folder**

After you have downloaded the map file, you need to copy it to your Warcraft III maps folder, which

is usually located in C:\Program Files\Warcraft III\Maps\Download. If you have a different installation path, you can find your maps folder by following these steps:

1. Open Warcraft III and go to Options.
2. Click on Game Data.
3. Look for the Custom Game Path and note down the location.
4. Close Warcraft III and open the Custom Game Path folder in your file explorer.
5. Paste the map file in the Download subfolder.

## **Launch Warcraft III and select the map from the custom game menu**

Now that you have copied the map file to your maps folder, you are ready to play Dota v6 77 ai 1.1.7. To do so, follow these steps:

1. Launch Warcraft III and go to Single Player.
2. Click on Custom Game.
3. Scroll down the list of maps and look for DotA v6.77 AI 1.1.7 Fun 2.7c.w3x.
4. Select the map and click on Play Game.
5. Choose your team, color, and AI difficulty level.
6. Click on Start Game.

## **How to play Dota v6 77 ai 1.1.7?**

### **Choose your game mode and difficulty level**

Before the game starts, you can choose your game mode and difficulty level by typing commands in the chat box. The game mode determines the rules and options of the game, such as which heroes are available, how many lives you have, and how fast you gain gold and experience. The difficulty level determines how smart and aggressive the AI bots are.

The default game mode is -ap (All Pick), which means you can choose any hero from the pool. The default difficulty level is -normal, which means the AI bots are moderately challenging. You can change these settings by typing different commands, such as:

- -ar (All Random): You get a random hero from the pool.
- -sd (Single Draft): You can choose from three random heroes (one from each attribute).
- -fun: You can choose from new fun heroes and items that are not available in the official map.
- -easy: The AI bots are less smart and aggressive.
- -hard: The AI bots are more smart and aggressive.

You can also combine different commands to create your own game mode, such as -arfun (All Random Fun) or -sdeasy (Single Draft Easy). For a full list of commands, type -commands in the chat box.

### **Pick your hero and buy your items**

After you have chosen your game mode and difficulty level, you can pick your hero and buy your items. To pick your hero, click on the hero icon on the top left corner of the screen and select one from the list. You can also type -random to get a random hero or -repick to change your hero (at a cost of gold).

To buy your items, click on the shop icon on the bottom right corner of the screen and select one

from the list. You can also use hotkeys to quickly buy items from different shops, such as B for basic items, U for upgrades, S for secret shop, F for fun shop, or R for recipes. You can also type -test to get unlimited gold and items for testing purposes.

## **Fight against the enemy team and destroy their base**

The objective of Dota v6 77 ai 1.1.7 is to fight against the enemy team and destroy their base, which is located at the opposite corner of the map. To do so, you need to work together with your allies, kill enemy heroes and creeps, destroy enemy towers and barracks, and finally destroy their ancient.

You can control your hero with your mouse and keyboard, using left-click to move or attack, right-click to cast spells or use items, and hotkeys to activate abilities or commands. You can also use the minimap on the bottom left corner of the screen to navigate the map or ping locations for communication.

## **Tips and tricks for Dota v6 77 ai 1.1 .7**

### **Use the -dm command before -fun to prevent some bugs**

If you want to play in fun mode, you should use the -dm (Death Match) command before the -fun command to prevent some bugs that might occur, such as heroes not respawning or items not working properly. The -dm command makes you get a new random hero every time you die, which adds more chaos and fun to the game.

### **Try out the new fun heroes and items**

Dota v6 77 ai 1.1.7 has many new fun heroes and items that are not available in the official map, such as Orcish Engineer, Santa Hat, Persuasive, and more. You can try them out by typing -fun in the chat box and picking them from the fun shop or the hero selection screen. Some of these heroes and items have unique abilities and effects that can change the course of the game, so be prepared for some surprises and laughs.

### **Experiment with different strategies and combinations**

Dota v6 77 ai 1.1.7 is a map that encourages creativity and experimentation, so don't be afraid to try out different strategies and combinations with your allies and enemies. You can use the -switch command to swap teams with another player, the -random command to get a random hero, or the -test command to get unlimited gold and items. You can also use the -nd command to respawn instantly after you die, or the -sp command to spawn a super creep for your team. The possibilities are endless, so have fun and enjoy the game.

## **Conclusion**

Dota v6 77 ai 1.1.7 is a fun version of the popular Warcraft III map that adds new heroes, items, and features to the game. It is a great way to play Dota with your friends or by yourself against AI bots, as it offers more variety and excitement than the official map. You can download and install Dota v6 77 ai 1.1.7 by following the steps in this article, and then choose your game mode and difficulty level, pick your hero and buy your items, and fight against the enemy team and destroy their base. You can also use some tips and tricks to enhance your gameplay experience, such as using the -dm command before -fun, trying out the new fun heroes and items, and experimenting with different strategies and combinations. Dota v6 77 ai 1.1.7 is a map that will make you laugh, cry, rage, and

have a blast.
