

# Dragon Ball Legends Summon Simulator Download: A Guide for Fans

If you are a fan of the popular anime and manga series Dragon Ball, you might have heard of Dragon Ball Legends, a mobile game that lets you collect and battle with your favorite characters from the franchise. But did you know that there is also a summon simulator that lets you try out different summons without spending any real money or crystals? In this article, we will explain what a summon simulator is, how to download and use it, what are the benefits of using it, and some tips and tricks for getting the best results from it.

## What is Dragon Ball Legends and what is a summon simulator?

Dragon Ball Legends is an action RPG game that features card-based combat and 3D graphics. You can choose from over 400 characters from the Dragon Ball universe, including Goku, Vegeta, Frieza, Broly, Majin Buu, and many more. You can also enjoy an original story mode that introduces a new character designed by Akira Toriyama, the creator of Dragon Ball. The game also has a PvP mode where you can challenge other players from around the world in real-time battles.

One of the main aspects of Dragon Ball Legends is summoning new characters to add to your roster. You can use Chrono Crystals, the premium currency of the game, or tickets to perform summons. Each summon gives you a chance to get a character of different rarities, from Hero (the lowest) to Sparking (the highest). The higher the rarity, the stronger the character and the more abilities they have.

A summon simulator is a tool that mimics the summoning system of Dragon Ball Legends. It allows you to perform unlimited summons without spending any Chrono Crystals or tickets. You can choose from different banners that feature different characters and rates. You can also see the statistics of your summons, such as how many characters of each rarity you got, how many duplicates you got, and how much money you would have spent if you did the summons in the actual game.

## How to download and use the summon simulator

There are several websites that offer a summon simulator for Dragon Ball Legends, such as

[GamePress](^1^), [DBZ Space](^2^), and [Games.lol](^6^). To download and use the summon simulator, you need to follow these steps:

1. Go to the website of your choice and find the summon simulator page.
2. Select the banner that you want to simulate. You can see the featured characters and their rates on each banner.
3. Select how many summons you want to do. You can choose from 1 to 10 summons at a time.
4. Click on the "Summon" button and watch the animation. You will see your results on the screen.
5. Repeat as many times as you want. You can reset your results by clicking on the "Reset" button.

## **What are the benefits of using the summon simulator**

Using the summon simulator has several benefits for Dragon Ball Legends players, such as:

- You can test your luck and see what characters you might get if you did the summons in the actual game.
- You can save your Chrono Crystals and tickets for banners that have better rates or characters that you really want.
- You can plan your team composition and strategy based on the characters that you have or might get.
- You can have fun and enjoy the thrill of summoning without spending any money or resources.

## **Tips and tricks for getting the best results from the summon simulator**

While using the summon simulator is mostly based on luck, there are some tips and tricks that can help you get better results, such as:

- Check out the rates and featured characters of each banner before choosing one. Some banners have higher chances of giving Sparking characters or specific characters that you might want.
- Use multiple websites to compare your results. Different websites might have different algorithms or data for their summon simulators. You can see which one gives you the most realistic or favorable results.
- Don't get too attached to your results. Remember that the summon simulator is not the actual game and your results might differ when you do the summons in the game. The summon simulator is just a tool for fun and planning, not a guarantee of what you will get.
- Don't let the summon simulator discourage you from playing the game. Even if you get bad results from the summon simulator, you might still get lucky in the game and get the characters that you want. The game also has other features and modes that you can enjoy besides summoning.

## **Conclusion: Summary and recommendations**

In conclusion, a summon simulator is a tool that lets you simulate the summoning system of Dragon Ball Legends without spending any Chrono Crystals or tickets. You can download and use the summon simulator from various websites, such as [GamePress], [DBZ Space], and [Games.lol]. Using the summon simulator has several benefits, such as testing your luck, saving your resources,

planning your team, and having fun. However, you should also be aware of some tips and tricks for getting the best results from the summon simulator, such as checking the rates and featured characters of each banner, using multiple websites to compare your results, not getting too attached to your results, and not letting the summon simulator discourage you from playing the game.

We hope that this article has helped you understand what a summon simulator is, how to download and use it, what are the benefits of using it, and some tips and tricks for getting the best results from it. If you are a fan of Dragon Ball Legends, we recommend that you give the summon simulator a try and see what characters you might get. You might be surprised by how much fun and excitement it can bring to your gaming experience.

## **FAQs: Five common questions and answers about the summon simulator**

Here are some of the most common questions and answers about the summon simulator for Dragon Ball Legends:

### **Q: Is the summon simulator accurate?**

A: The summon simulator is based on the data and rates of the actual game, so it should be fairly accurate. However, it is not 100% accurate, as there might be some differences in the algorithms or data between the websites that offer the summon simulator and the game itself. Also, keep in mind that the summon simulator is based on probability, which means that your results might vary depending on your luck.

### **Q: Is the summon simulator safe?**

A: The summon simulator is safe to use, as long as you use it from reputable websites that do not ask for your personal or account information. You do not need to log in or register to use the summon simulator, so there is no risk of losing your account or getting hacked. However, you should always be careful when downloading anything from the internet and make sure that your device has antivirus software installed.

### **Q: Is the summon simulator legal?**

A: The summon simulator is legal to use, as it does not violate any terms of service or policies of Dragon Ball Legends or its developers. The summon simulator does not modify or interfere with the game in any way, nor does it give you any unfair advantage or benefit in the game. The summon simulator is simply a tool for entertainment and planning purposes only.

### **Q: Can I transfer my results from the summon simulator to the game?**

A: No, you cannot transfer your results from the summon simulator to the game. The summon simulator is not connected to your game account or data in any way. The characters that you get from the summon simulator are only for simulation purposes and do not affect your actual game progress or inventory. If you want to get the same characters in the game, you will have to do the summons in the game using Chrono Crystals or tickets.

### **Q: Can I request a specific banner or character for the summon simulator?**

A: No, you cannot request a specific banner or character for the summon simulator. The websites

that offer the summon simulator usually update their banners and characters according to what is available in the actual game. However, they might not have all the banners or characters at all times, as they depend on their sources and data. You will have to check their websites regularly to see what banners or characters they have for their summon simulators.
