What is Jurassic World 3 about?

Jurassic World 3 is the epic conclusion of the Jurassic World trilogy, which began in 2015 with Jurassic World and continued in 2018 with Jurassic World: Fallen Kingdom. The trilogy is a sequel to the original Jurassic Park trilogy, which started in 1993 with Jurassic Park and ended in 2001 with Jurassic Park III.

The Jurassic World trilogy follows the story of Owen Grady and Claire Dearing, who worked at the Jurassic World theme park on Isla Nublar, where genetically engineered dinosaurs were exhibited to the public. However, things went wrong when a hybrid dinosaur named Indominus Rex escaped from its enclosure and caused havoc on the island. Owen and Claire managed to survive and escape, along with four other survivors: Zach and Gray Mitchell, Claire's nephews; Zara Young, Claire's assistant; and Barry Sembaine, Owen's friend and colleague.

In Jurassic World: Fallen Kingdom, Owen and Claire returned to Isla Nublar three years later to rescue the remaining dinosaurs from a volcanic eruption that threatened to wipe them out. However, they discovered that they were part of a plot by Eli Mills, the assistant of Benjamin Lockwood, John Hammond's former partner who funded the creation of Jurassic Park. Mills wanted to capture the dinosaurs and sell them to the highest bidder at an auction in Lockwood's estate. He also revealed that he had created another hybrid dinosaur named Indoraptor, using the DNA of Indominus Rex and Velociraptor.

Owen and Claire teamed up with Franklin Webb, a former Jurassic World IT technician; Zia Rodriguez, a former Marine and paleo-veterinarian; and Maisie Lockwood, Lockwood's granddaughter who lived in his estate. They managed to stop Mills and free the dinosaurs from captivity. However, they also learned that Maisie was actually a clone of Lockwood's deceased daughter, who died in a car accident. Mills tried to use Maisie as leverage to get the Indominus Rex bone sample from Owen and Claire, but he was killed by a Tyrannosaurus Rex. Maisie then decided to release the dinosaurs into the wild, believing that they deserved to live as she did.

Jurassic World 3 picks up four years after the events of Jurassic World: Fallen Kingdom. The dinosaurs have spread across the world and have caused conflicts with humans and other animals. Owen and Claire have adopted Maisie and are living under the radar. However, they are hunted by Biosyn, a rival company that wants to use Maisie's DNA for their own experiments. They also have to face a new danger: a swarm of genetically engineered giant insects that can kill dinosaurs and humans alike.

Jurassic World 3 will also feature the return of original Jurassic Park stars Sam Neill, Laura Dern and Jeff Goldblum as Dr. Alan Grant, Dr. Ellie Sattler and Dr. Ian Malcolm respectively. They will join Owen and Claire in their fight against Biosyn and the insects. The movie will also explore the origins of Jurassic Park and the relationship between Hammond and Lockwood.
